Hiring Manager

BMC Software

Dear Hiring Manager,

I am writing to express my keen interest in the AI Architect position at BMC Software, as advertised on [Platform where you saw the advertisement]. My extensive experience in designing and implementing scalable, production-grade AI systems, particularly within enterprise environments, aligns perfectly with the requirements of this role and BMC's commitment to driving business value through innovative technology.

Throughout my 19+ years in software development and architecture, I have consistently focused on leveraging cutting-edge technologies to solve complex business challenges. My experience at Dell.com, where I spearheaded the adoption of microservices and event-driven architectures using Confluent Kafka, resulted in a 30% reduction in operational costs and a significant improvement in system responsiveness. I am particularly excited about the opportunity to build BMC's next-generation Agentic AI platform from the ground up, drawing upon my expertise in LangGraph, multi-agent systems, and MCP (Model-Controller-Planner) architectures to create a reliable, controllable, and cost-efficient solution. My background includes hands-on experience with LLM engineering and the development of AI-powered products for B2B customers. I understand the critical importance of balancing innovation with practicality, ensuring that AI systems are not only novel but also deliver tangible business impact. My experience at Microsoft, where I led UI modernization initiatives and contributed to DevOps implementations, demonstrates my ability to drive significant improvements in user engagement and code delivery speed. I am confident that my skills and experience make me a strong candidate to contribute to BMC's success in the AI space.

I am eager to learn more about this opportunity and discuss how my skills and experience can contribute to BMC's AI initiatives. Thank you for your time and consideration. I look forward to hearing from you soon.

Sincerely,

Arijit Bhattacharya
