Hiring Manager

Solventum

Dear Hiring Manager,

I am writing to express my keen interest in the AI Architect - Modern AI Applications position at Solventum. My extensive experience in software architecture, coupled with a deep understanding of modern AI technologies, aligns perfectly with the requirements outlined in the job description and Solventum's commitment to innovation in healthcare.

Throughout my 19+ year career, I have consistently driven innovation and delivered impactful solutions by leveraging cutting-edge technologies. My experience at Dell.com, Cognizant, Microsoft, Capgemini and Wipro has equipped me with a comprehensive understanding of the software development lifecycle, cloud computing frameworks (AWS and Azure), and event-driven architectures (Confluent Kafka). I'm particularly excited about the opportunity to apply my expertise in agentic AI and multi-agent systems, potentially using tools like LangGraph, to address Solventum's challenges in the healthcare sector. My background in LLM engineering and a strong grasp of the MCP (Model-Control-Policy) framework would allow me to contribute significantly to the development of robust and ethical AI solutions. In my previous role as Software Architect Products at Dell.com, I spearheaded the adoption of microservices design principles, implemented test-driven development methodologies, and optimized CI/CD pipelines, resulting in significant improvements in code quality, deployment speed, and operational cost savings. I am confident that my ability to lead teams, drive innovation, and deliver tangible results would make me a valuable asset to Solventum. I am eager to contribute to a company that prioritizes empathy, insight, and clinical intelligence in its pursuit of improving lives.

Thank you for considering my application. I am enthusiastic about the opportunity to discuss how my skills and experience can contribute to Solventum's success. I look forward to hearing from you soon.

Sincerely,

Arijit Bhattacharya
