Hiring Manager

WillWare Technologies

Dear Hiring Manager,

I am writing to express my keen interest in the Gen AI Architect position at WillWare Technologies, as advertised. My extensive experience in software architecture, coupled with my deep understanding of generative AI technologies, makes me confident in my ability to significantly contribute to your team's success.

Throughout my 19+ year career, I have consistently spearheaded the adoption of cutting-edge technologies to drive innovation and efficiency. My experience at Dell.com, Cognizant, and Microsoft has provided me with a strong foundation in designing and implementing scalable, reliable, and cost-effective solutions. I have hands-on experience in developing agentic AI applications, including Retrieval-Augmented Generation (RAG) and model fine-tuning pipelines, which aligns perfectly with the requirements of this role. I am particularly excited about the opportunity to define GenAI architecture and integrate it with core enterprise platforms at WillWare Technologies. My expertise in technology selection, including foundational models like GPT, Claude, and Llama, as well as vector databases and orchestration frameworks like LangChain, positions me well to lead the evaluation and benchmarking process. Furthermore, my experience in designing event-driven architectures using Confluent Kafka and optimizing CI/CD pipelines demonstrates my commitment to performance, cost optimization, and continuous improvement.

I am eager to discuss how my skills and experience can benefit WillWare Technologies. Thank you for your time and consideration. I look forward to hearing from you soon.

Sincerely,

Arijit Bhattacharya
