

Manav Ghosh

Bengaluru, India · +91-9620044420 · manavghosh@gmail.com · <https://www.linkedin.com/in/manavghosh/> · <https://github.com/manavghosh> · <https://medium.com/@manavghosh>

Key Achievements & Proof Points

API2MCP — Open Source Framework (github.com/manavghosh/api2mcp · pypi.org/project/api2mcp · MIT Licensed): PyPI-published Python framework converting REST, GraphQL, and Postman Collection APIs into MCP servers via a LangGraph multi-agent pipeline. Features enterprise security (OAuth 2.0, API keys, secret management), checkpoint-based state persistence, plugin architecture, CI, code coverage, and a STRIDE-based threat model for enterprise procurement.

Thought Leadership & Publications — Weekly writer on Medium publishing on agentic AI, multi-agent systems, the Agentic Development Lifecycle (ADLC), and enterprise LLM tooling. Recent articles include: 'Intro to the Agentic Development Lifecycle (ADLC)', 'API2MCP: The Open-Source Bridge to Agentic AI', 'Agent Swarms: The Future of Decentralized AI', 'Claude Code Agent Teams vs Sub-Agents'. Active commentator on LinkedIn translating emerging agentic AI research into enterprise-ready guidance for architects and engineering leaders.

Intelligent message loss detection and remediation in microservices — Patent 12436830 — Granted Oct 2025

Professional Experience

Distinguished Member of Technical Staff / Enterprise Architect · Dell Technologies

Apr 2017 – Present

- Designed and architected Dell.com's Agentic AI conversational assistant, enabling autonomous multi-turn task handling and contextual reasoning powered by LLMs.
- Drove enterprise-wide API modernization to OpenAPI 3.0, standardizing service integration as foundational work for agentic tool-use and orchestration.
- Authored 9+ granted and pending patents in intelligent microservices resilience, secure communications, and sustainability modes, showcasing innovation in enterprise architecture.
- Evangelized AI-ready enterprise architecture through internal workshops, open-source engagement, and cross-BU advisory — preparing teams for agent-native systems and llm-driven automation.
- Architected cloud-native applications on Kubernetes, .NET Core, and PCF with auto-scaling and performance resilience, enabling elastic compute for AI models.
- Introduced Green Software Engineering and patented Sustainability Modes for microservices, reducing compute energy consumption and operational costs, aligning with responsible AI principles.
- Spearheaded architecture of Dell's \$2B e-commerce platform, achieving sub-2-second load times, demonstrating expertise in scalable solution architecture.
- Pioneered Chaos Engineering and Failure-as-a-Service across CI/CD pipelines, improving system resiliency and uptime, crucial for reliable ai agents.
- Mentored cross-functional teams, nurturing top talent into technical leads and architects through structured learning frameworks, fostering expertise in agentic ai.
- Built engineering partnerships across sales, marketing, and vendor ecosystems, aligning technology strategy with business vision, including automation platforms.

Senior Software Engineer / Software Engineering Architect · Microsoft India R&D Pvt. Ltd.

Jul 2016 – Apr 2017

- Led architecture for Microsoft's Digital Contracting initiative, enabling seamless OEM customer onboarding via automated agreement workflows, a form of llm-driven automation.
- Designed Azure DocumentDB module for the OEM platform, transitioning from SQL to NoSQL for scalability and query performance, supporting future ai models.
- Directed cloud-first modernization to Azure, replacing traditional server hosting and establishing engineering quality metrics, enabling a platform for agentic ai.

Software Development Principal Engineer / Application Architect · [Dell International, Bangalore](#)

Jul 2013 – Jul 2016

- Directed architecture for ATS and Delivery Promise programs across US, EMEA, and APJ markets, showcasing expertise in enterprise architecture.
- Built Estimated Shipping & Delivery Time framework using AngularJS, improving UI speed and customer experience, demonstrating impact on business revenue.
- Recruited and mentored top engineering talent from IITs, NITs, and IIMs, fostering next-generation technical leadership in areas like ai agents.

Technical Architect · [eMids Technologies](#)

2009 – 2013

Senior Consultant · [Capgemini Consulting](#)

2008 – 2009

Team Leader · [NIIT Technologies](#)

2007 – 2008

Various engineering roles · [Eforce Global](#), [PwC](#), [Compucom](#), [Thinklabs](#)

1999 – 2007

Chief Technology Advisor (Concurrent) · [Funded Startup](#)

Ongoing

- Defining AI technology vision, roadmap, and agentic architecture; managing strategic client engagements and driving key technology initiatives, including llm-driven automation.
