Hiring Manager

Cognizant

Dear Hiring Manager,

I am writing to express my keen interest in the Director - Transformation Head position at Cognizant, as advertised. With over 20 years of experience in data, AI, and platform engineering, I am confident that my expertise aligns perfectly with the requirements of this role and Cognizant's strategic objectives in AI Training Data Services.

My career has been centered around driving innovation and building scalable solutions for enterprise AI, with a strong emphasis on the AI/ML lifecycle and platform architecture. As a Distinguished Member of Technical Staff at Dell Technologies, I spearheaded the architecture of Dell.com's Agentic AI conversational assistant, demonstrating my ability to translate business needs into tangible AI solutions. My experience includes designing frameworks for high-quality training data generation, ensuring compliance with data governance and ethical AI standards, and guiding engineering teams in building modular components for data ingestion, profiling, and annotation. I have a proven track record of building and leading offshore teams, establishing Centers of Excellence (CoE), and ensuring seamless delivery across global locations (GCC). My expertise extends to cloud ecosystems (AWS, Azure, GCP) and integrating emerging technologies for AI data readiness. I am particularly adept at making informed build vs. buy decisions, a critical aspect of this role.

I am eager to discuss how my skills and experience can contribute to Cognizant's success in the AI Training Data Services domain. Thank you for your time and consideration. I look forward to hearing from you soon.

Sincerely,

Manav Ghosh
