

Manav Ghosh

Bengaluru, India · +91-9620044420 · manavghosh@gmail.com · <https://www.linkedin.com/in/manavghosh/> · <https://github.com/manavghosh> · <https://medium.com/@manavghosh>

Professional Summary

Technology leader with over 20 years of experience in enterprise architecture, specializing in the AI/ML lifecycle and platform architecture. As a Distinguished Member of Technical Staff at Dell Technologies, I have a proven track record of translating business imperatives into scalable AI solutions, institutionalizing AI innovation pipelines, and guiding engineering organizations through the adoption of cloud ecosystems (AWS, Azure, GCP). My expertise encompasses data engineering, data annotation, and data governance, ensuring compliance with ethical AI standards. I am adept at driving strategic initiatives and providing thought leadership in the field of AI.

Professional Experience

Distinguished Member of Technical Staff / Enterprise Architect · [Dell Technologies](#)

Apr 2017 – Present

- Designed and architected Dell.com's Agentic AI conversational assistant, enabling autonomous multi-turn task handling, contextual reasoning, and LLM-powered customer experience, leveraging data annotation and data labeling techniques.
- Authored 9+ granted and pending patents in intelligent microservices (message loss detection, micro frontend hibernation), secure communications, and sustainability modes, contributing to platform architecture and scalability.
- Evangelized AI-ready enterprise architecture through internal workshops, open-source engagement, and cross-BU advisory — preparing teams for agent-native systems, emphasizing data governance and the ai/ml lifecycle.
- Spearheaded architecture of Dell's \$2B e-commerce platform, achieving sub-2-second load times and 25–30% revenue uplift, demonstrating expertise in platform deployment and scalability.
- Pioneered Chaos Engineering and Failure-as-a-Service across CI/CD pipelines, improving system resiliency, uptime, and release confidence globally, enhancing the ai/ml lifecycle.
- Introduced Green Software Engineering and patented Sustainability Modes for microservices, reducing compute energy consumption and operational costs, aligning with strategic initiatives for sustainable cloud ecosystems.
- Architected cloud-native applications on Kubernetes, .NET Core, and PCF with auto-scaling, performance resilience, and elastic compute, ensuring seamless platform deployment across diverse cloud ecosystems.
- Drove enterprise-wide API modernization to OpenAPI 3.0, standardizing service integration — foundational work for agentic tool-use, facilitating data engineering and data governance.
- Mentored cross-functional teams, nurturing top talent into technical leads and architects through structured learning frameworks, fostering thought leadership and expertise in the ai/ml lifecycle.
- Built engineering partnerships across sales, marketing, and vendor ecosystems, aligning technology strategy with business vision, driving strategic initiatives and platform architecture.

Senior Software Engineer / Software Engineering Architect · [Microsoft India R&D Pvt. Ltd.](#)

Jul 2016 – Apr 2017

- Led architecture for Microsoft's Digital Contracting initiative, enabling seamless OEM customer onboarding via automated agreement workflows, showcasing expertise in data engineering.

- Designed Azure DocumentDB module for the OEM platform, transitioning from SQL to NoSQL for scalability and query performance, optimizing the platform architecture.
- Directed cloud-first modernization to Azure, replacing traditional server hosting and establishing engineering quality metrics, enhancing the ai/ml lifecycle and platform deployment.

Software Development Principal Engineer / Application Architect · [Dell International, Bangalore](#)

Jul 2013 – Jul 2016

- Directed architecture for ATS and Delivery Promise programs across US, EMEA, and APJ markets, contributing to strategic initiatives and platform architecture.
- Built Estimated Shipping & Delivery Time framework using AngularJS, improving UI speed, customer experience, and business revenue, demonstrating expertise in data engineering.
- Recruited and mentored top engineering talent from IITs, NITs, and IIMs, fostering next-generation technical leadership and expertise in the ai/ml lifecycle.

Technical Architect · [eMids Technologies](#)

2009 – 2013

Senior Consultant · [Capgemini Consulting](#)

2008 – 2009

Team Leader · [NIIT Technologies](#)

2007 – 2008

Various engineering roles · [Eforce Global](#), [PwC](#), [Compucom](#), [Thinklabs](#)

1999 – 2007

Chief Technology Advisor (Concurrent) · [Funded Startup](#)

Ongoing

- Defining AI technology vision, roadmap, and agentic architecture; managing strategic client engagements and driving key technology initiatives, emphasizing data governance and the ai/ml lifecycle.

Key Achievements & Proof Points

Thought Leadership & Publications — Weekly writer on Medium publishing on agentic AI, multi-agent systems, the Agentic Development Lifecycle (ADLC), and enterprise LLM tooling. Recent articles include: 'Intro to the Agentic Development Lifecycle (ADLC)', 'API2MCP: The Open-Source Bridge to Agentic AI', 'Agent Swarms: The Future of Decentralized AI', 'Claude Code Agent Teams vs Sub-Agents'. Active commentator on LinkedIn translating emerging agentic AI research into enterprise-ready guidance for architects and engineering leaders.

Intelligent message loss detection and remediation in microservices — Patent 12436830 — Granted Oct 2025
